

LEVEL

2018 - 2019

— ENGLISH —

LEVEL ETHICAL TRADE POLICY

LEVEL strongly believes in ethical principles and ethical business practices. We believe our company can make an impact. Therefore, we have implemented codes of conduct (coc) for our business. Our coc is based on conventions related to working conditions and the environment which are x acknowledged and have been legally adopted in most countries. We are committed to working for ethical improvements throughout our supply chain.

ENVIRONMENTAL PHILOSOPHY

Our company is committed to causing as little harm as possible to the environment throughout our value chain/partners, as well as respecting local (best) ethics wherever we are present.

PRODUCTION PHILOSOPHY

Using environmentally friendly materials, technologies and techniques wherever possible. Our products are intended to have a long life span, be repairable and recyclable.

ANIMAL WELFARE

LEVEL products and raw materials take animal welfare into account, and LEVEL is strongly against the mistreatment of any animals. We will not use anything that comes from mulesing of sheep, picking the down from live birds or the use of traps in any of our products.

LEVEL's growth has always been propelled by its enthusiasm for technical innovation and creative design. What we like is to enjoy the great emotions that the mountains, snow and slopes offer to all of us.

LEVEL is a reference in the ski and snowboard accessories market, known for its progressive design, technological innovation and exceptional quality.

These characteristics have made LEVEL the number one choice for top ski and snowboard athletes from all over the world.

*We are ready and motivated to take the next exciting steps into the future.
Thank you to everybody who has been part of the LEVEL story!*

3 YEAR WARRANTY PROGRAM

LEVEL offers a Limited Warranty against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilization and are within the Limited Warranty covenants which exclude normal wear.

(All Gloves) - Two, (2) or Three, (3), Year Limited Warranty (as specified on the product). LEVEL offers a Two, (2) or a Three, (3), Year Limited Warranty, from the time of initial purchase, against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilization and are within the Two, (2) or Three, (3), Year Limited Warranty covenants which exclude normal wear.

Two, (2), Year Limited Warranty on Beanies, Bags and Ski poles.

LEVEL will repair or replace any of the above-mentioned products from the original purchase date against manufacturer's defects within the scope of normal and appropriate utilization and within the Two, (2), Year Limited Warranty covenants which exclude normal wear.

Claims should be presented at the point of initial purchase with proper documentation to validate claims thereunder.

HOW TO ACTIVATE THE WARRANTY

To activate the warranty please visit www.levelgloves.com/warranty-policy/ and register your Level product within 30 days of purchase.

Please complete all of the required fields to activate your warranty. You can also upload copy of your purchase receipt. If you do not upload a copy of the receipt, please keep your original receipt in the event you have a defective claim for the Level product purchased.

COVER AND EXCLUSIONS

LEVEL warranty covers any type of manufacturing or material fault. With regards to this warranty, any non-conformities of the product with your expectations cannot be considered as faults. The warranty expressly excludes any damages caused by: misuse; normal wear and tear, damages; tampering; incorrect handling of the gloves; negligence or carelessness; damages caused by falls and/or accidents or any alteration due to external causes, including any repairs carried out by unauthorized vendor; damages caused by factors/events outside LEVEL's control; users' subjective assessments, such as comfort and fit; damages caused by prolonged exposure to light and/or heat sources. All coverage under this warranty is void if any modification, change or alteration has been made to the product.

HOW TO USE THE WARRANTY

To activate the warranty, please supply LEVEL with:

a) the product your warranty claim, through any LEVEL "authorized" point of sale in the country you reside in; b) the original purchase receipt; if you did not upload your original receipt during at the time you registered your product.

LEVEL shall check its registration on the levelgloves.com website within the terms stated by these regulations. For any further information, please contact LEVEL Customer Service at feedback@levelgloves.com.

LEVEL reserves the right to check on the fault you are complaining about and to carry out any repair or replacement after said check. If, following LEVEL's check, the fault is not considered a manufacturing or material fault, LEVEL reserves the right to charge the customer for the repair and repair as well as shipping costs.

If LEVEL cannot repair or replace the product or parts of it, LEVEL will make you an offer, taking into consideration the age of the product, for its replacement with the same model or an equivalent model.

HOW TO WARRANTY YOUR LEVEL PRODUCT(S)

1. Go to www.levelgloves.com/warranty-policy/ and register your product.

2. Visit your LEVEL Authorized Retailer.

Bring your LEVEL Product in question with your receipt to where the product was purchased.

3 YEAR WARRANTY PROGRAM

FIT SYSTEM

The close collaboration between R&D and athletes has allowed Level to develop a fit system for skiers and riders that can ensure the best fit for every kind of performance along with maximum comfort. For this reason all the gloves are divided into 3 different fits and are specifically designed for male and female hands.

RELAXED FIT / EXTRA WARM

Ski: designed for all who love powder with a new cut that allows for a more abundant fit. This new style allows for more protection from the cold while maintaining a good level of sensitivity for the hands.

Snowboard: mainly used in the protection segment line that allows the housing of Biomex, and creating the right balance between warmth and comfort.

NATURAL FIT / VERY WARM

Ski: for sports skiers that require for more warmth and great comfort. Ensuring the fine balance between precision and sensitivity.

SLIM FIT / BETTER GRIP

Ski: for our world cup athletes who need a perfectly tight fitting glove allowing them to have a great feel when holding the ski poles so they can perform their best on the racetrack.

Snowboard: this is a fashionable product; the better fitting the better the rider can grab their board or freestyle skis. Apart from its tight fit the palm has a special reinforcement to increase the grip.

SIZING CHART

CIRCUMFERENCE CM - INCH		HAND LENGTH CM - INCH		MEN'S SIZE		WOMEN'S SIZE		JUNIOR'S SIZE	
11	3,93	13,4	4,88	-		-		4	Jr XXS

28	10,43	23	8,74	11	4XL	-		-	

Two things to consider regarding size and measurements of the hand.

HAND LENGTH

With your hand open, measure from the tip of your middle finger, down to the base of the palm drawing a straight line.

HAND CIRCUMFERENCE

With your hand open, measure around the circumference of your hand, at the base of your knuckles.

CHILDREN'S Form 6 months up to 12 years old.

00 SIZE	0 SIZE	I SIZE	II SIZE	III SIZE	IV SIZE	V SIZE	VI SIZE
6-12 MONTHS	1-2 YEARS	2-3 YEARS	4-5 YEARS	5-6 YEARS	7-8 YEARS	9-10 YEARS	11-12 YEARS

THERMO-PLUS TECHNOLOGY

Thermo-Plus is Levels certification and guarantee for outstanding insulation and heat retention of the natural warmth of the hands even in the worst climate conditions. Level created a machine to test the gloves in a series of extreme weather conditions. The results, collected in an efficiency index, report the gloves' thermicity values.

Thermo-Plus products values aim to be at least 30% higher than standard gloves' ones.

GUARANTEED TO KEEP YOU WARM

Product certified for temperatures up to
-25° C | -13 F

Product certified for temperatures up to
-20° C | -4 F

Product certified for temperatures up to
-15° C | 5 F

Product certified for temperatures up to
-8° | 17,5 F

SCIENTIFIC TESTS TO GUARANTEE THE THERMOPLUS CERTIFICATION

The choice of the appropriate material for the construction of the gloves is of fundamental importance in order to achieve ergonomic comfort and high thermal insulation. The thermal insulation and moisture management of the gloves is created through the use of different materials. Such materials have been tested in both a climatic chamber and in outdoor conditions using wireless sensors combined with infrared thermography. The results show substantial differences in terms of thermal comfort between the gloves, proving that Level provides the best thermal comfort for all its products.

In the thermal image #1 no leakage of heat can be seen from the outer surface of the glove (absence of the color red) thanks to its excellent insulation.

After removing the glove, the thermal image #3 shows the hot temperature of the hand (absence of the color blue) thanks to the gloves' insulation.

THERMAL BEHAVIOUR OF THE MATERIALS IN REAL AND SIMULATED SKIING CONDITIONS.

Thermal insulation is one of the key factors for protection against the cold. Since hands tend to have a large surface area compared to their volume and small muscle mass, they are more sensitive to cold exposure in respects to other parts of the human body (Kulane, 2009).

It has also been reported that the feeling of cold discomfort in the hands will dominate even if clothing of proper insulation are used on the rest of the body. Hands are most comfortable with a skin temperature of 33°C (91.4°F) and relative humidity next to the skin of about 60%. The feeling of cold starts at temperatures around 25°C (77°F), whilst discomfort from cold is reported to begin with temperatures below 20-21°C (68-69.8°F).

CUSTOM FIT SYSTEM

This new system gives the possibility for the creation of a product that is customised to the skiers/riders needs. The padding in the custom fit gloves is made with a breathable thermoformable material, that after 180 seconds of heating at 80°C in our dedicated oven, takes the shape of the skiers hand. While the gloves are still hot the rider has to wear them for 3-5 minutes so they can take the shape of the hand. This customization can be repeated as often as they like. The benefits for the skier are: a custom fitting glove, improved comfort, high sensitivity and a better grip on the ski poles.

KIRAX STIMULATOR SYSTEM

Level is the first company to introduce the exclusive Kirax system into ski gloves. This innovative technology stimulates the body's nervous system in a unique way so that it enhances reaction time, performance and a general sense of well being.

The shape of the design maximizes comfort while gently massaging the proprioceptive nervous terminations on the back of the hand to jump start the body's reflexes.

Kirax is a natural reflex stimulator. It exerts a gentle pressure to stimulate the skin's response system in areas where there is a higher concentration of proprioceptive nervous terminals. The brain perceives the increased stimulus generated by Kirax and responds with an increased sensibility.

LEATHERS

With over 20 years of experience in the world of snow sports and ongoing research, Level has always aimed to choose the highest quality fabrics and leathers for their wide range of gloves which are differentiated by thickness and quality specifications for their many uses.

WATERPROOF GOATSKIN:

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

HAIR SHEEP PITTARDS:

A waterproof leather that is exceptionally soft, used especially on the backs of the gloves.

SHEEP SKIN:

A very soft leather used for women's gloves, especially on the back of the hand to give the glove extra softness.

Coated waterproof Goatskin:

This leather is used on the palms of freeride gloves, its exceptional waterproof resistance keeps the glove dry and long lasting.

QUARTZ PITTARDS LEATHER:

Pittard leather has a lasercut design providing an extra strong grip in specific points of the palm.

DRAGON PITTARDS:

This waterproof goat leather has a design that makes it special and durable. It is used on the palms of snowboard gloves.

KERATAN LEATHER:

KERATAN is a unique leather treatment designed to significantly increase the abrasion protection and durability of finest performance goatskin leathers. The benefits of KERATAN are: resistance to extreme levels of abrasion, functionality and comfort. The long effective life combined with FireBloc II, can make them flame resistant to the Martindale abrasion test; 45,000 revolutions to hole (average value 1mm thick VVR100).

FABRICS

The choice of fabrics is made by our R&D department, in collaboration with top athletes and advice of different stylistic groups from all over the world. We follow the main trends in style and color but keeping as the primary objective fabrics with exclusive features, both in structure and trend that makes them unique and inimitable.

SPRAY TEST

All Level fabrics are tested with the "spray test" to be approved and certified for maximum water resistance.

DRY TECHNOLOGY

Gloves engineered with GORE-TEX® inserts + Gore warm technology are durably waterproof, windproof and breathable – guaranteed. Even in harsh conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

Gloves engineered with GORE® WINDSTOPPER® product technology offer absolute windproofness and water resistance while being extremely breathable. They are the ideal solution for all kinds of high aerobic sports in moderate weather conditions.

Gloves engineered with GORE-TEX® inserts + Gore active technology are durably waterproof, windproof and highly breathable – guaranteed. The whole system of inner lining, membrane and outer material is optimized for enhanced breathability. This increases the level of comfort in an even wider range of activities.

Special treated leather that withstands tough, outdoor conditions. The leather is thoroughly waterproofed and its structural properties provide effective protection against moisture.

Gloves engineered with GORE-TEX® inserts + Gore 2in1 technology are durably waterproof, windproof and breathable – guaranteed. Their innovative construction with two different chambers makes it easy and convenient to change between direct grip and warmth.

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

Gloves engineered with GORE-TEX® inserts + Gore grip technology are durably waterproof, windproof and breathable – guaranteed. Thanks to their innovative layered construction, they provide outstanding dexterity and tactility for an optimum grip. This makes it easier to handle your ski poles, zippers, goggles, bags, etc.

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

INSULATION

Level products are insulated with exclusive, high-fill power goose down ranging from 550 to 900 fill, which represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

Soft, supple, and less bulky than high-loft insulation. The exclusive blend of fibers traps in more air for more warmth.

Level is presenting a new silk lining in the women's line which offers a great softness and increases thermal insulation.

The unique microfibers of Thinsulate insulation are ten times smaller than the fibers of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth. It will avoid the formation of cold spots in your hands by filling all the multiple airspaces.

The new LEVEL insulation solution. Soft feeling and thermal benefits together.

Polartec® Power Stretch® fabric features 4-way stretch and it is very breathable. It provides warmth without weight. The 4-Way stretch system provides unrestricted freedom of movement. It keeps skin dry even when you sweat, maintains hands warm without the weight and bulk of traditional insulating fabrics and will reduce the effects of wind chill thanks to its fabrics.

This natural material is characterized by thin fibers which do not retain odors making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

HIGHLIGHTS

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

FLEX PALM

The elastic cordura insert on the palm allows for a better fit, more flexibility and a cozy feeling.

H&R

Round finger tips are more durable and reduce catching on abrasive objects.

KEVLAR

Level uses only schoeller kevlar, the strongest kevlar on the market. Guaranteed to have the best durability.

NOSE CLEANER

Special flock fabric placed on your thumb. Provides a gentle feeling when used as a nose wipe while riding or skiing.

BREATHABLE SYSTEM

An air exchanging vent is placed on the back of the glove allowing moisture to escape. This improves the drying time of the glove and avoids hands getting wet.

GOGGLE CLEANER

This new design of seude material is placed in a very efficient position making it easier to clean goggles.

I-TOUCH SYSTEM

The "i-touch" system allows you to use your smart phone without having to remove the glove.

MULTIFUNCTION POCKET

Pocket positioned on the top of the glove. May be used to insert hand warmers, skipass or other small objects.

OUTSIDE FINGER STICHING

This construction provides a better fit and a perfect grip.

POWDER CUFF

This nylon cuff has a convenient adjustment for the closure around the wrist preventing snow from getting inside when riding powder.

REMOVABLE LINER - WARMAX

A removable lining where the back of the lining is built with a hot thick material whilst the palm is thinner to maintain sensitivity. The removable liner can be removed and washed.

SILICONE PRINTED PALM

A silicone pattern applied to the palm. Provides excellent waterproofing, improved sensitivity, and exceptional grip.

SUPER FABRIC

Coming from MotoGP experience this material is now the "state of the art" of ski racing impact solution. Extra resistant to friction at high speeds.

WIND&RAIN COVER

Created by Level to improve wind and rain protection this technical feature is the perfect solution for temperature and weather changes

PREFORMED FINGERS

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

STORM LEASH

This cord is used to secure the glove to your hand with an adjustable plastic. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

THERMO SILVER LINING

Little silver dots reflect and retain the warmth your body generates, while dissipating moisture and excess heat.

WORLD FINEST LEATHER

The finest goat leather in the world. Levels' leathers natural water repellency, durability, and insulating properties guarantee the best performance.

WINTER 2018.19

BLISS

The Bliss line, specially designed by women for women who love snow. Level used its first hand experience as well as input from a diverse group of female riders and skiers to develop a line of women's gloves and mitts unlike any other: warmer, dryer, softer, ultra-breathable, and unimaginably comfortable.

LEVEL LEATHER BALM

Our all-natural Level leather balm is formulated to protect your gloves and is a great way to prevent leather from drying out. Prolongs the life, suppleness and water repellent properties of the leather.

Glove Care

Tips for a long life

Level gloves are made to last. With some love and care they will last even longer. Good for you, good for the environment.

1) Grease the leather regularly and it will resist moisture, wear and tear better. Moisten the leather a little first. Use a polishing cloth and rub in the grease until the leather is saturated. Do this in the evening and the grease is absorbed during the night. We primarily recommend leather balming sport gloves in goatskin and cowhide.

2) If you have gloves with breathable materials like GORE-TEX®, you should avoid silicone impregnation. It clogs the pores and reduces the material's breathability.

3) With the carabiner clasp that comes with some models, you can easily attach the gloves to a backpack. In that way, you don't risk losing them, and they can dry without losing shape.

4) Dyed leather may stain clothing when wet, so don't place a wet glove on other garments.

5) Gloves rarely get damaged while skiing. Instead, the edges of skis and boot buckles are normally the cause of damage to your gloves. Be careful when handling your skis or boots!

NFC TECHNOLOGY

The glove has NFC (near field communication) tags which control and activate the main functions of a smartphone or an action camera with a single tap. A set of tags are inserted in the glove right under the fingertips, each one prompt to trigger an action when the finger gets close to the smartphone.

Near Field Communication (NFC) is a short-range wireless connectivity technology that provides intuitive, simple, and safe communications between electronic devices. LEVEL gloves with built-in NFC will simplify the way devices interact with one another, helping people receive calls, play music and even set up your action cam to capture the ride of your life.

LEVEL APP FOR SMARTPHONES

Level application is intended to control and activate the main functions of a smartphone or an action camera in a very easy and functional way.

SMART GLOVES FOR YOUR FAST RIDING!

WINTER 2018.19

NFC - TECHNOLOGY

Controlling music or an action cam while going down the mountain compromises safety. That's why Level introduces in its gloves an up and coming technology known as NFC which will enable skiers or boarders the ride of their life!

BIOMEX PROTECTION

Control Board - TÜV SÜD Product Service GmbH

It's all about pushing the limits. Level gloves with Biomex wrist protection can help you stay in one piece...So you'll be riding tomorrow instead of seeing the doctor. Levels proven Biomex wrist protection system is the result of an extensive and on-going collaboration between snowboarders, the medical community, and engineers who understand bio-mechanics. Biomex research and development is based at the Klinik Gut, center of bone and joint surgery in St.Moritz, Switzerland, where Level pros and physicians design and develop the most advanced wrist support technology on the market – the Biomex Plus. For beginners, the most frequent cause of a wrist fracture in snowboarding is a backwards fall. For more experienced riders it's a front and sideways fall. There are many wrist guards on the market, but based on their design, they don't all deliver the same degree of safety performance.

SNOWBOARD PROTECTION

1 - DOUBLE DENSITY MATERIAL

Higher resistance and better comfort

2 - SWALLOW TAIL DESIGN

New ergonomic shape for better comfort and ease of movement

3 - BIOMEX SELF ADJUSTMENT

The biomex piece can be used with or without removable lining

4 - SHOCK ABSORBER MATERIAL

Shock reduction and better fit

WOMEN SNOWBOARD PROTECTION

6- SPECIFIC WOMEN'S FIT

Specifically designed for women's hands for improved fit and comfort

FREESKI BIOMEX EVOLUTION

SOFT

HARD

6- SPECIFIC DESIGNED FOR SKIERS

Shorter and softer material, it is attached to the lining and fits anatomically to the hand.

HOW DO YOU GET HURT?

During a fall your wrist is put in hyper extension (fig. 1) (The back of hand is pushed towards the forearm). In addition to this hyper extension, the wrist often experiences two types of twisting forces technically referred to as pronation (fig. 2) And radial adduction (fig. 3). It's the combination of these three forces that most often causes a wrist injury such as a wrist fracture.

Most wrist guard systems deal with hyperextension alone, but the Biomex system addresses all three of the forces that contribute to wrist injury. Standard wrist guards frequently push the fracture further up the forearm (fig. 4).

HOW DO YOU GET HURT?

Biomex (fig. 5) is the only wrist guard that keeps the wrist in an anatomically strong position, where muscle forces and bone congruency combine to provide optimum stability without compromising the freedom to move.

HELPS TO REDUCE INJURIES BY 7,5 TIMES WITH BIOMEX PLUS

WINTER 2018.19

PROTECTION

The exclusive biomex-plus system, renewed with new self-adjustment is just one among the many applied technologies. The research partnership with the Klinik Gut of St. Moritz has allowed Level to devise a special inner glove system to increase protection for the wrist in snowboarders.

THUMB PROTECTION SYSTEM

Hand injuries in general tend to be disregarded by both patients and doctors, until it happens to oneself. Never was this more the case than in thumb injuries, as the importance of the thumb is usually under appreciated, until injured.

INJURIES OF THE THUMB ARE FAIRLY COMMON IN SPORTING ACTIVITIES.

In skiing they are reported to be the second most frequent injury after the knee. In detail thumb injuries are reported to make up between 5% - 20% of all injuries in Alpine skiing and are sustained by approximately 80,000-240,000 patients per year world wide.

The Ski Thumb is an injury affecting the ulnar collateral ligament (UCL) at the metacarpophalangeal joint of the thumb. The mechanism is due to the forces which are applied when a skier falls with the pole in his/her hand. The handle of the pole will act as a fulcrum applying forces across the joint and thereby putting the ligament under strain.

The skier hits the surface with high velocity (high energy trauma). If the hand is stretched out as a natural reflex, there is a significant chance that the thumb will be forced outwards resulting in a fracture of the UCL.

THE GOAL OF THE NEW LEVEL THUMB PROTECTOR IS TO HELP PREVENT INJURY TO THE UCL AND BONE STRUCTURES OF THE THUMB.

1- SUPER FABRIC

Extra resistant and sliding advantage.

3- SIDE BUCKLE

Strong adjustable closing system.

2- ERGONOMIC SHAPE

Guarantees fit and comfort.

4- THUMB POCKET

Holds thumb in place.
