**Planks is a British rider-owned clothing company inspired by over three decades of having fun in the mountains. Our passion for skiing is the lifeblood of Planks and our mission is to ensure we produce the very best garments that exceed the expectations of riders worldwide.**

**Simple, functional design is at the core of our brand philosophy. Our 18/19 collection embraces performance, style and value for money, helping you to make the most out of every moment you spend in the mountains.**

**Drop cliffs not bombs.**

# Jim Adlington

**"I ski because it makes me feel happy. Skiing pushes me and allows me to express who I am. It drives my need to overcome fear and everyday challenges. My journey as a professional athlete has allowed me to ski in some of the greatest places on earth - Skiing is my love and from this foundation, Planks was born."**

Planks Founder

# The Woodsy Signature Series

After first learning to ski during a free taster session at Sheffield Ski village dry-slope, Woodsy has been following his dream of becoming a professional skier ever since.

After years of honing his skills in the UK and around the world, Woodsy is now among the very best skiers on the planet. His story embodies everything we love and respect at Planks and we couldn't be more stoked to be working with him on developing his signature series.

# Planks Athletes

We are grateful to work with such a talented group of skiers and could not be more proud to have them as part of the Planks family.

Whether they are helping with design or testing garments in the field, their constant passion and dedication continues to drive our product development.

Together we work very closely on generating and curating great stories, imagery and video content, so we can communicate our passion for skiing with our customers.

As such our social media channels are some of the fastest growing in the industry, inspiring and engaging with skiers worldwide.

# Fabrics & Technologies

Redeveloped for 18/19, our fabrics and technologies explained...

## RIDE DRY 20

Planks RIDEdry20 is bluesign® approved fabric, engineered to stand up to the tough demands of life in the backcountry. Available in 3 layer and 2 layer, they are both made up of a nylon face fabric for extra durability with a peach finish to provide a soft hand feel. They have a bonded technical membrane with a 20,000mm waterproof rating and 20,000g/m2 breathability rating and the 3 layer is then finished with a soft mesh backing to keep it super lightweight. A solvent-free DWR coating has been applied to both encourage water and snow to bead off the face fabric.

## RIDE DRY 15

Planks RIDEdry15 is a bluesign® approved 2 layer fabric with a mechanical stretch engineered for all-mountain ski performance and ultimate comfort. The face fabric is a mixture of REPVE® recycled polyester and virgin polyester. It has a 15,000mm waterproof rating and a 15,000g/m2 breathability rating. A solvent-free DWR coating has been applied to encourage water and snow to bead off the face fabric.

## RIDE DRY 10

Planks RIDEdry10 is a bluesign® approved 2 layer fabric, designed to keep you dry and feeling good. The face fabric is a mixture of REPVE® recycled polyester and virgin polyester. It has a 10,000mm waterproof rating and 10,000g/m2 breathability rating. A solvent-free DWR coating has been applied to encourage water and snow to bead off the face fabric.

## RIDE soft

Planks RIDEssoft is a versatile 3 layer soft shell fabric that's designed to work just as well in the streets as it does on the mountain. The face fabric is a mixture REPVE® recycled polyester and elastane to give a soft hand feel and slight stretch. It has a bonded technical membrane with a 8,000mm waterproof rating and 5,000g/m2 breathability rating. It is backed with a mixture of soft fleece (men's) and a longer super-soft finish (women's), both designed for extra warmth and comfort. A solvent-free DWR coating has been applied to encourage water and snow to bead off the face fabric.

## RIDE FRESH UV

Planks RIDEfreshUV is made from a mixture of recycled REPVE® polyester, virgin polyester and elastane providing a four way stretch for ultimate comfort. The temperature regulating and breathable fibres naturally wick moisture away from the skin to keep you feeling warm and dry. It is finished with an antibacterial treatment that's odour resistant to keep you smelling fresh.

**PrimaLoft® Black Eco Insulation**

PrimaLoft® Black Eco is a synthetic down-like insulation made entirely from post-consumer recycled materials. It provides high levels of warmth and comfort whilst being lightweight and extremely durable.

# Be More Friendly.

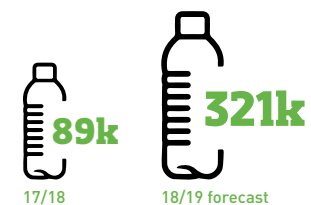

Our **Be More Friendly** initiative marks the start of a pivotal journey for Planks. We are constantly striving to improve our production techniques to lessen our impact on the planet we love. Closer to home we continue to work with our charitable partners to give back to the wider snowsports community.

We are extremely proud to be working with REPREVE® who are the world's leading recycled yarn manufacturer. With their help, we have now incorporated recycled content into 68% of our SKUs.

This recycled material comes entirely from plastic bottles that would otherwise end up in landfill and the ocean. The entire REPREVE® recycling and re-purposing process is monitored and certified throughout in order to accurately trace the amounts of recycled content within the final garment.

We are now also working with Bluesign® approved fabrics, helping to set the standard for environmentally friendly and safe production.

# Dealers

We have an extensive library of assets complete with logos, product descriptions, images, videos and more to ensure we can support all of our dealers with their online merchandising requirements.

For info and access please contact
