clear image
SEE BETTER.

HOW DOES IT WORK?

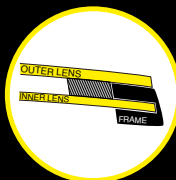

AIR FLOW = PRESSURE EQUALIZING

PORON™ FILTER = WEATHER BARRIER

The 1-2-3 Shred Replacement System™ allows skiers and snowboarders to readily swap out lenses in order to adapt to changes in lighting and snow conditions.

1.

2.

3.

TRADITIONAL GOGGLES SHRED NOCLOG™

Shred Noclog™ is an hydrophobic treatment on the vents to minimize fogging.

TADASHI FUSE

SIMPLIFY

This sleek, almost frameless style features cylindrical double lens with CONTRAST BOOSTING LENS™ and NODISTORTION® technologies that ensure astonishing vision. SHREDWIDE™ technology provides the largest possible field of view. With the 1-2-3 SHRED REPLACEMENT SYSTEM™, lens change takes just 3-steps. Size and fit that are optimized in the M to XL helmet size range. Bonus lens included.

Fit	EXTRA LARGE	
Measuring Unit	EU / cm	US / inch
Head Circumference	55-63	21.65"-24.80"

LENS: high precision and impact protection Carved Cylindrical double lens / 100% UVA-UVB-UVC protection.
 FRAME WIDTH: 195mm / Height: 105mm.
 STRAP WIDTH: 50mm.
 WEIGHT: 175 g
 MULTIPLE PATENTS PENDING.

Shred's industry-leading engineered design technology, with a lens and frame design that enables to see more of what's ahead of and around you.

Shred's CBL technology allows better visibility in varying snow surfaces and light conditions.

For visual clarity at all elevations, Shred's patent pending NODISTORTION® technology uses a semi-permeable valve to equalize the pressure between the dual lens chamber and current atmospheric conditions.

- ALSO FEATURING:**
- + 1-2-3 SHRED REPLACEMENT SYSTEM: the simplest system for 3-step quick and easy lens changes.
 - + BONUS LENS + lens thermal hard case.
 - + NOCLOG.
 - + ANTI FOG.
 - + Universal helmet compatibility.
 - + Ergonomic frame design.
 - + Tapered face foam.
 - + NOREFLECT treatment to avoid reflections in the inner lens.
 - + Grip on straps.
 - + Whipped cream multilayer face foam.

MONOCLE

Monocle is a retro look, large lens, ski and snowboard cylindrical goggle with SHREDWIDE™ expanded field of view. The CONTRAST BOOSTING LENS™ and NODISTORTION® technologies (available in select models) ensure astonishing vision. Size and fit are optimized for the M to XL helmet size range. Three-layer tapered face foam provides an amazing comfort.

Fit	LARGE	
Measuring Unit	EU / cm	US / inch
Head Circumference	54-62	21.25"-24.40"

LENS: cylindrical double lens / 100% UVA-UVB-UVC protection.
 FRAME WIDTH: 185mm / Height: 105mm.
 STRAP WIDTH: 40mm.
 WEIGHT: 130g.
 MULTIPLE PATENTS PENDING.

Shred's industry-leading engineered design technology, with a lens and frame design that enables to see more of what's ahead of and around you.

SHRED NOCLOG hydrophobic vent foam to minimize fog.

Shred's inside lens features a porous cellulose providing superior water shedding and a special anti fog treatment for extremely long lasting clarity. The full perimeter venting promotes maximum airflow to keep your vision clear in all condition.

ALSO FEATURING:

- + CONTRAST BOOSTING LENS available in select models.
- + NODISTORTION® available in select models.
- + Universal helmet compatibility.
- + Ergonomic frame design.
- + Tapered face foam.
- + NOREFLECT treatment to avoid reflections in the inner lens.
- + Grip on straps.
- + Whipped cream multilayer face foam.

VLT is the amount of light transmitted through a lens. VLT transmittance is then translated into a Lens Category Number. The higher the number the more visual light that is transmitted through the lens. The lower the CAT number the more visual light that is transmitted through the lens.

Filter Category classified as:
S0 Very light lens,
S1 Light lens,
S2 Medium lens,
S3 Dark lens,
S4 Very dark lens.

By working with a color spectrum selective light filter, we created a lens that mimics the behavior of noise cancelling headphones on a plane to eliminate color noise while riding. The CONTRAST BOOSTING LENS also boosts contrast, which enhances image definition to be able to see more details on the snow.

ALL CONDITIONS LENS. These lenses are TRULY designed to perform under the widest spectrum of light and weather conditions. After years of extensive field tests we came to undersand that it was not a matter of light transmission, but instead of contrast and definition. Our STEALTH REFLECT lenses feature a contrast and definition enhancing tint that provides unique performance in any condition, from fog and flat light to bluebird, all the way to dark afternoons and snowy days. All this while providing effective UVA protection even on the brightest days on the glacier.

GOGGLE HARD CASE

- + Fully rigid case designed to protect your SHRED goggles.
- + Black with a neon green zipper.

code: DACBACD11

SINGLE LENS HOLDER BAG

- + Soft case to protect your SHRED spare single lenses.
- + 5 pockets hold up to 10 spare single lenses.

code: LHB

CARVED CYLINDRICAL LENS THERMAL CASE

- + Fully rigid case designed to protect your SHRED CARVED AMAZIFY spare lenses.
- + Black with an elastic band to secure the lens inside.
- + Perfectly fits inside of your jacket or backpack, for you to be ready for any change of conditions.

code: DACTCCF

CARVED SPHERICAL LENS THERMAL CASE

- + Fully rigid case designed to protect your SHRED CARVED STUPEFY and SMARTEFY spare lenses.
- + Black with an elastic band to secure the lens inside.
- + Perfectly fits inside of your jacket or backpack, for you to be ready for any change of conditions.

Bumper NoShock
Basher NoShock

The patent pending SLYTECH NOSHOCK™ technology is a Honeycomb Cone Structure integrated within the core of the impact energy absorption element. SLYTECH NOSHOCK™ further increases the shock absorption efficiency of traditional EPS and EPP foam liners, reducing the transference of energy of impact to the head providing higher structural strength and dissipating impact forces multi-directionally.

CASIDION NANOTECH SHIELDING LINEAR ACCELERATION PROTECTION

DURABILITY

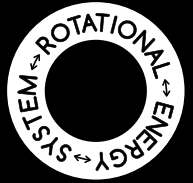

FEATURED ON

Basher Ultimate

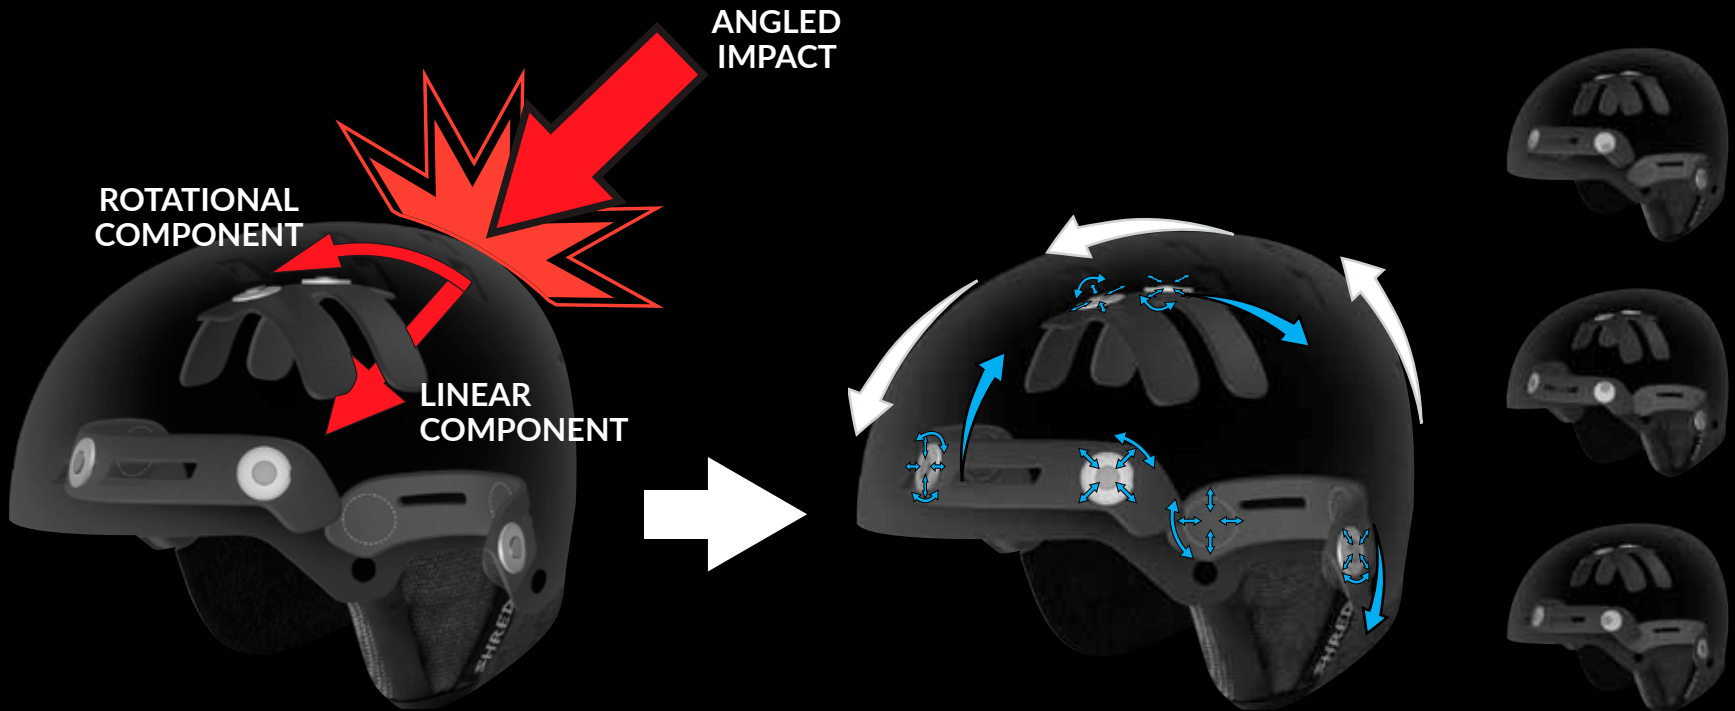

Through a partnership with the Italian engineered materials company Alia Mentis, we've developed helmet liners that use Casidion to aid in dissipating forces. Casidion is an acrylic self-healing foam infused with carbon nanostructures that dissipates impact energy more efficiently in a smaller volume. It allows us to greatly reduce the thickness of the impact liner to shed weight and eliminate bulk while still providing extraordinary energy absorption in repeated impact scenarios.

ROTATIONAL ENERGY SYSTEM™

ROTATIONAL ACCELERATION PROTECTION.

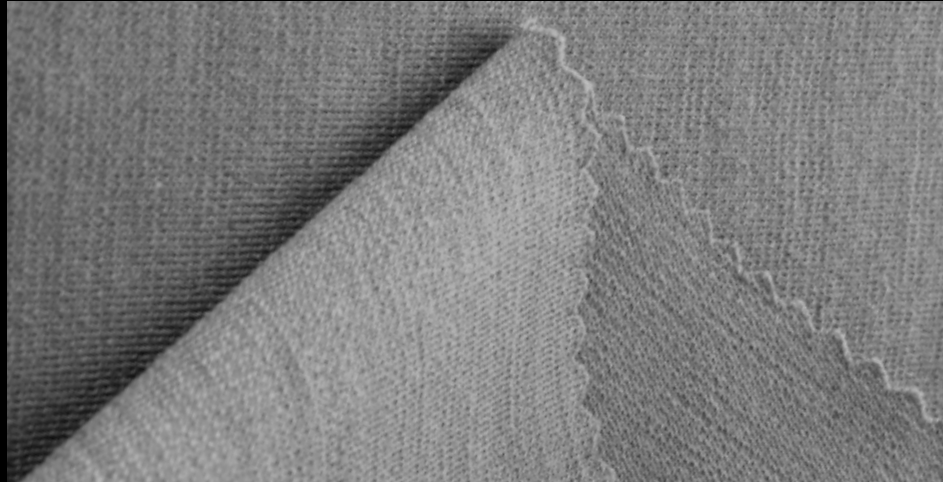

ABSORPTION UNIT

The Rotational Energy System™ patent pending system minimizes the effects of rotational accelerations to the head on impact by allowing a relative rotation of the helmet on the head.

Measuring Unit	EU / cm	US / inch	EU / cm	US / inch	EU / cm	US / inch
Head Circumference	52-55	20.50"-21.65"	56-58	22.05"-22.85"	59-62	23.25"-24.40"

CONSTRUCTION: In-Mold with integrated SLYTECH NOSHOCK™ honeycomb.

SAFETY STANDARDS: EN1077B (Europe Snow) / ASTM F2040 (USA Snow) / EN 1078 (Europe Bike) / CPSC (USA Bike).

MATERIAL: PC, Super Light EPS, SLYTECH 2ND SKIN™ XT.

WEIGHT: 420g [S size].

MULTIPLE PATENTS PENDING.

Slytech NoShock™ technology is a patent pending honeycomb cone structure integrated within the core of the helmet to dissipate linear forces to the head during impact.

ALSO FEATURING:

- + Integrated 3-position vent switch.
- + Fit Perfect Finder.
- + Compatible with aftermarket audio systems.
- + Removable earpads.

Shred RES™, Rotational Energy management System is a patent pending 360-degree flotation technology which helps reduce rotational accelerations to the head during impact by mimicking the natural cushioning behavior of the fluid between the skull and the brain.

Moisture wicking liner treated with anti-microbial and anti-odor Aegis® Microbe Shield®.

TRADITIONAL BACK PROTECTORS

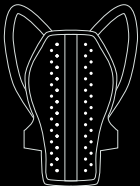

HARD SHELL

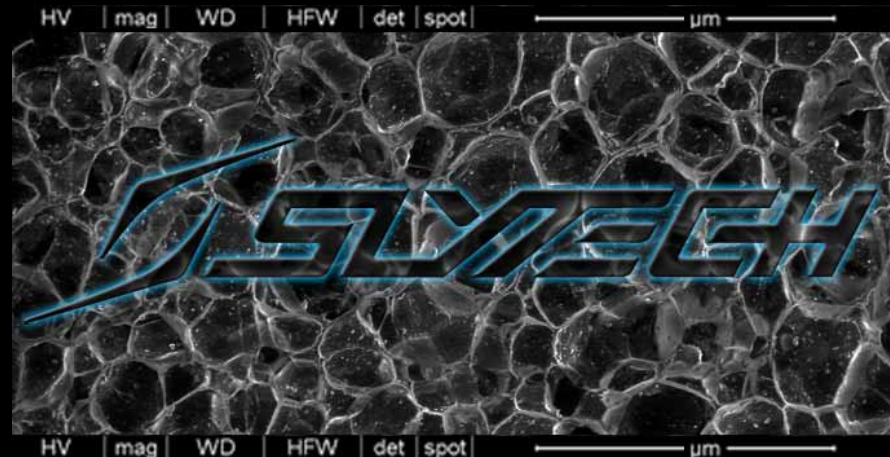

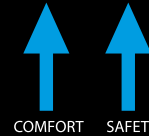

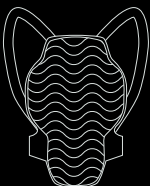

WARNING
HARD PLASTIC CAN HURT

SOFT FOAM

VISCO-ELASTIC PU, NBR

POLYOLEFIN

Our protectors intelligently and progressively adapt to the different energies and speeds of impact to always provide complete protection.

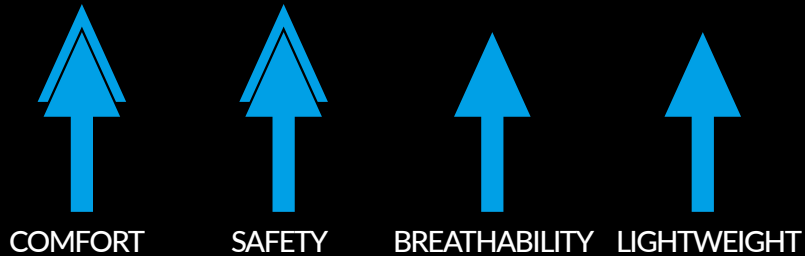

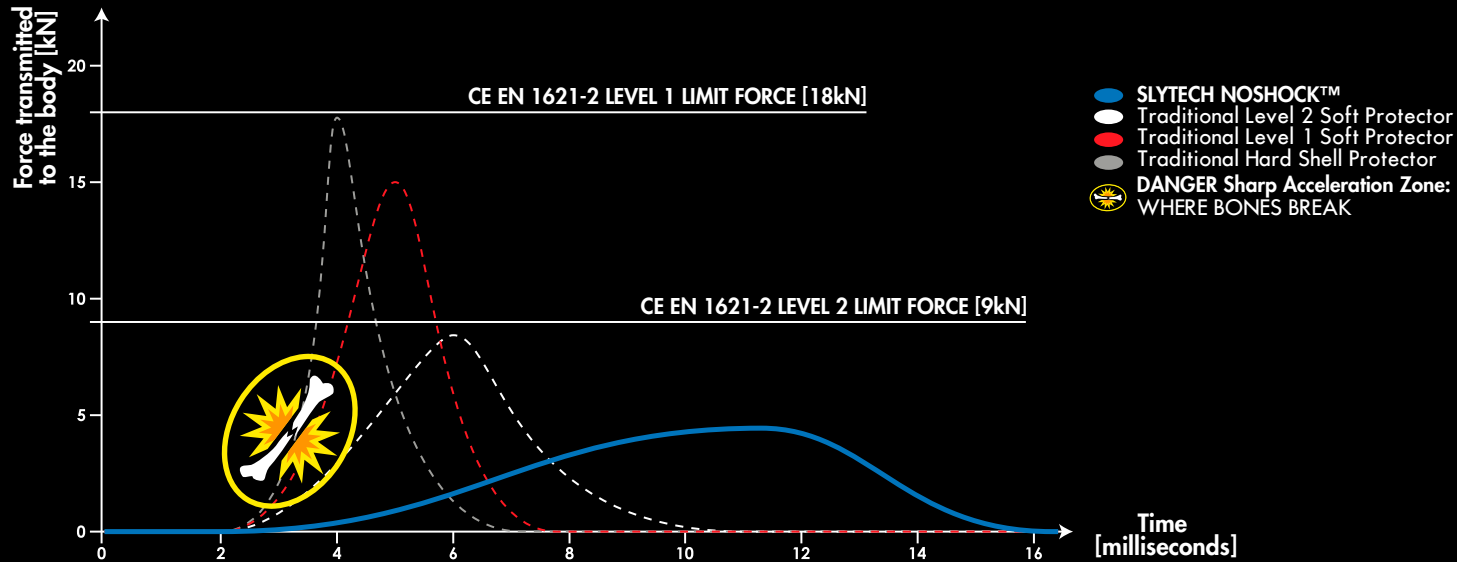

Our protectors are completely Formamide free, non-allergenic and don't contain harmful substances.

Our protectors are designed to return to their original shape after every impact to effectively absorb new blows.

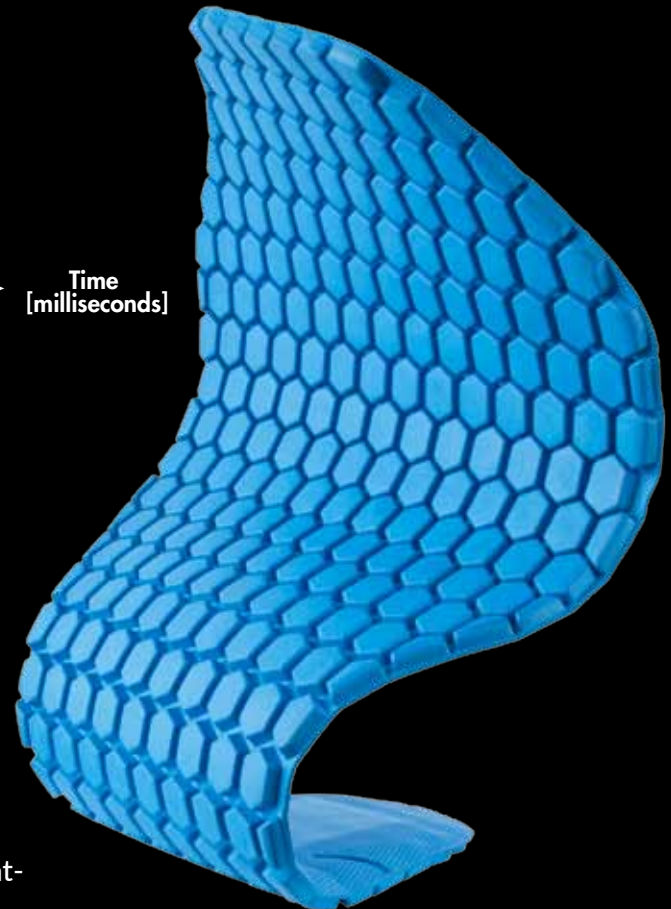

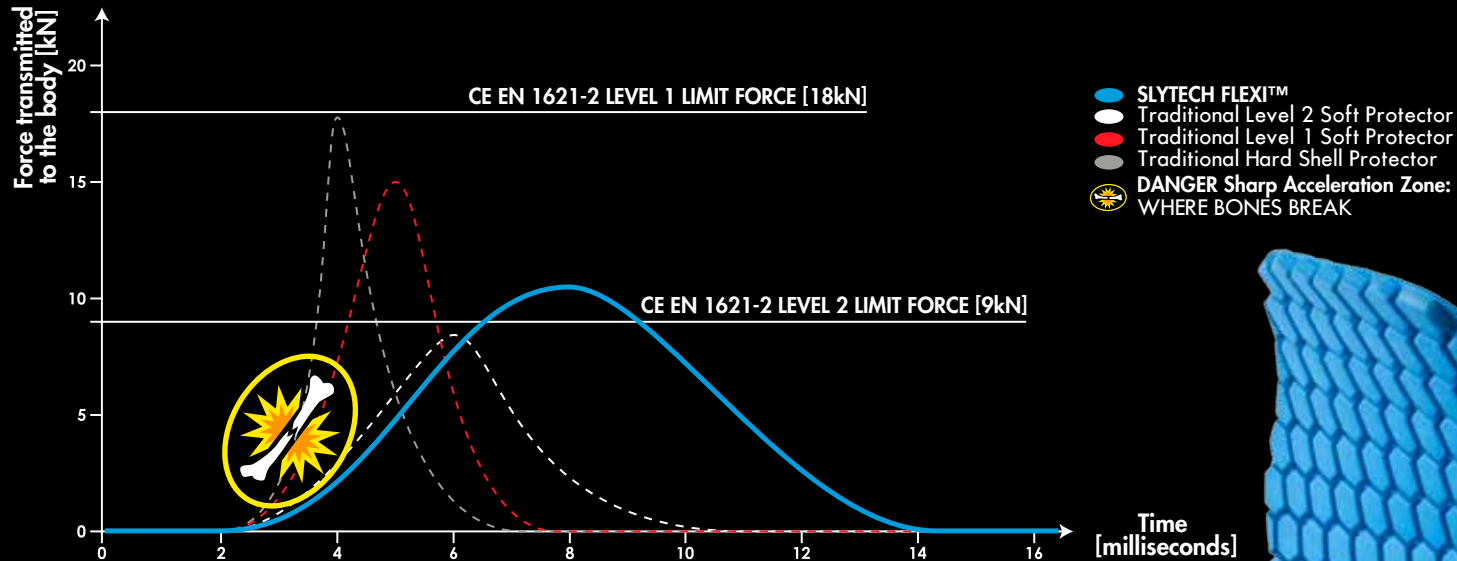

To simulate conditions typical of winter sports, our protectors are also tested at -20°C.

Patent pending honeycomb cone structure that further increases the performance of both safety and comfort of our proprietary Slytech 2ND SKIN™ XT foam, reduces weight and promotes ventilation.

SLYTECH FLEXI

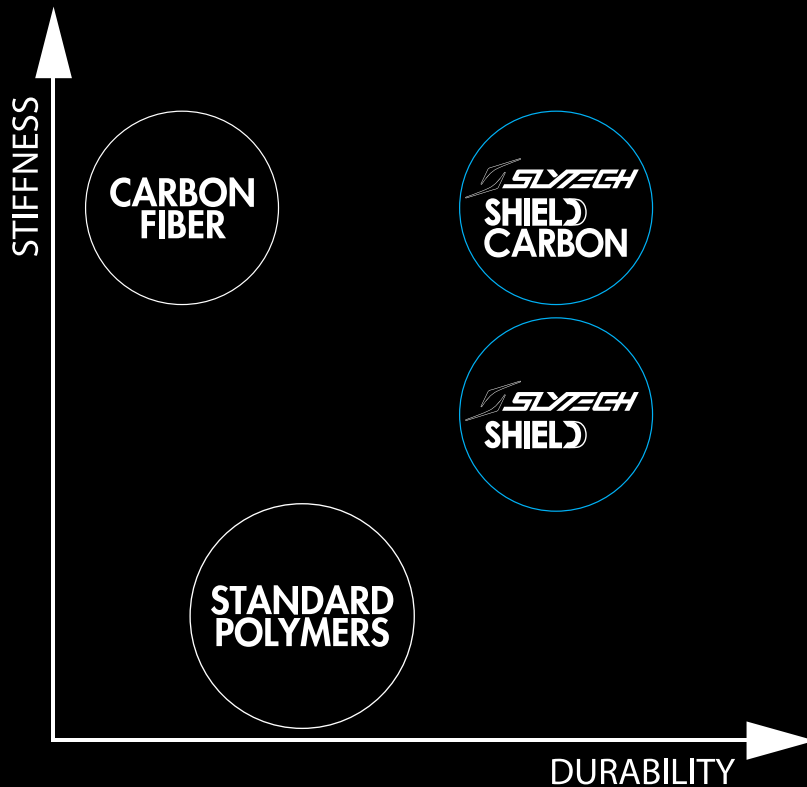

Exceptionally thin, flexible, and light, the protective element features a hexagon pattern that enables it to mold to your skin and match every move you make.

COMPARISON CHART

	 HARD SHELL	 SOFT FOAM <small>VISCO-ELASTIC PU, NBR</small>	 SOFT FOAM <small>POLYOLEFIN</small>	 NOSHOCK™	 FLEXI™
COMFORT	★	★★	★★★	★★★★	★★★★★
SAFETY	★	★★★★	★★	★★★★★	★★★★

LIGHTWEIGHT	★★	★★	★★★	★★★★	★★★★★
VENTILATION	★★	★★	★★	★★★★★	★★★★

SLYTECH SHIELD CARBON combines carbon fiber technology with our SLYTECH SHIELD material to obtain extraordinarily durable, lightweight and stiff shells.

SLYTECH MULTI DN technology with ribs designed to boost gate-clearing speed by limiting the contact surface and minimizing energy absorption on impacts.

SLYTECH SHIELD CARBON features NOFRICTION PTFE technology that drastically reduces friction between the gate and the guard. The embedded Teflon® (PTFE) in the blend lubricates the impact with the gate and boosts speed.

STIFFNESS = SPEED
MULTI DN = SPEED
NOFRICTION = SPEED

SLYTECH SHIELD is SLYTECH engineered material made with the most advanced technopolymers making it extremely stable and durable, both at low and warm temperatures. It also features NO-FRICTION technology additives that minimize friction between the shell and the gate limiting speed loss.

BACK PROTECTORS NOSHOCK

Slytech Back Protectors NoShock from Shred are ski and snowboard back protectors featuring SLYTECH NOSHOCK™ technology that offers the highest level of protection (level 2) with amazing comfort and flexibility.

Proprietary foam that intelligently and progressively adapts to different forces and impact speeds for thorough protection-even in low energy crashes. Simply put, it stays flexible when you ride, then hardens and protects you when you crash.

Patent pending honeycomb cone structure that further increases the performance of both safety and comfort of the proprietary Slytech 2ND SKIN™ XT foam, reduces weight and promotes ventilation.

Our protectors intelligently and progressively adapt to the different energies and speeds of impact to always provide complete protection

BACK PROTECTORS FLEXI

Slytech Back Protectors Flexi from Shred are ski and snowboard back protectors featuring SLYTECH 2ND SKIN™ XT protective foam, it comfortably matches every move skiers and riders make. They are the most lightweight, thin, and flexible back protectors on the market. Specifically designed to fill a market gap for user friendly back protection.

Proprietary foam that intelligently and progressively adapts to different forces and impact speeds for thorough protection-even in low energy crashes. Simply put, it stays flexible when you ride, then hardens and protects you when you crash.

Exceptionally thin, flexible and light, the protective element features a hexagon pattern that enables it to mold to your skin and match every move you make.

Our protectors intelligently and progressively adapt to the different energies and speeds of impact to always provide complete protection

SLYTECH HAND GUARDS CARBON

Conceived, developed and tested by Ted Ligety himself, our patent pending hand guards wrap the back of the hand to protect against gate impact, icy bumps and deep ruts. They feature SLYTECH SHIELD CARBON advanced composite material that ensures the best impact protection, while simultaneously offering the lowest possible friction rate thanks to the addition of PTFE. Their ANATOMICAL SHAPE and fastening system allows them to be snug and maneuverable. Compatible with Slytech arm guards and gloves/mittens our hand guards allow you to drag your knuckles safely just like Mr.GS.

MATERIAL - SLYTECH SHIELD CARBON shell / RUBBER INSERTS

SIZES: XS - M / M-XL Dimensions: 13 x 12 x 8 cm

WEIGHT: 220 g/pair

Patent pending

COLORS - Black/Rust, Black White

XS-M CODE: YSCHAGH12S

M-XL CODE: YSCHAGH12M

FEATURES

SLYTECH SHIELD CARBON - Combines carbon fiber technology with our SLYTECH SHIELD material to obtain extraordinarily durable, lightweight and stiff shells, without the chipping of traditional carbon.

NOFRICTION PTFE - SLYTECH SHIELD CARBON features NOFRICTION PTFE technology that drastically reduces friction between the gate and the guard. The embedded PTFE in the blend lubricates the impact with the gate and boosts speed.

The shell's ANATOMICAL SHAPE gives the comfortable and perfect armguard fit.

READY-ON STRAPS provide an effective tighten/release system that allows for fast on-off and race-ready fitting.

Optimized for Slytech gloves and mittens.

GUARDS CARBON

Slytech Shin Guards Carbon from Shred provide unmatched protection and gate clearing speed for ski racing. They feature SLYTECH SHIELD CARBON advanced composite material and NOFRICTION PTFE technology to minimize friction, as well as SLYGRIP FOAM to keep the guard in place.

Combines carbon fiber technology with our SLYTECH SHIELD material to obtain extraordinarily durable, lightweight and stiff shells, without the chipping of traditional carbon.

SLYTECH MULTI DN technology with ribs designed to boost gate-clearing speed by limiting the contact surface and minimizing energy absorption on impact.

SLYTECH SHIELD CARBON features NOFRICTION PTFE technology that drastically reduces friction between the gate and the guard. The embedded PTFE in the blend lubricates the impact with the gate and boosts speed.

GUARDS

Slytech Guards from Shred provide superior protection and gate clearing speed for ski racing. They feature SLYTECH SHIELD and SLYTECH MULTI DN technology to reduce friction, boosting ski race gate clearing speed and performance. Unparalleled fit and comfort.

SLYTECH SHIELD is SLYTECH engineered material made with the most advanced technopolymers making it extremely stable and durable, both at low and warm temperatures.

SLYTECH MULTI DN technology with ribs designed to boost gate-clearing speed by limiting the contact surface and minimizing energy absorption on impact.

The shell's anatomic shape gives the comfortable and perfect shinguard and forearmguard fit.
