# VISION

At Shred and Slytech, we empower athletes to push their limits-and simply have fun. Guided by a love for the mountains, we work together to drive innovation. From our eyewear to our protection, the resulting products blend sophisticated materials, fresh technology, and exceptional engineering. Simply put, we fuel passion and progression by building the products of our dreams.

## TRADITIONAL BACK PROTECTORS

### HARD SHELL

**WARNING**  
HARD PLASTIC CAN HURT

### SOFT FOAM

VISCO-ELASTIC PU, NBR

POLYOLEFIN

Our protectors intelligently and progressively adapt to the different energies and speeds of impact to always provide complete protection.

Our protectors are completely Formamide free, non-allergenic and don't contain harmful substances.

Our protectors are designed to return to their original shape after every impact to effectively absorb new blows.

To simulate conditions typical of winter sports, our protectors are also tested at -20°C.

# SLYTECH NOSHOCK™

COMFORT

SAFETY

BREATHABILITY

LIGHTWEIGHT

Patent pending honeycomb cone structure that further increases the performance of both safety and comfort of our proprietary Slytech 2ND SKiN™ XT foam, reduces weight and promotes ventilation.

# SLYTECH FLEXI

- SLYTECH FLEXI™
- Traditional Level 2 Soft Protector
- Traditional Level 1 Soft Protector
- Traditional Hard Shell Protector
- DANGER Sharp Acceleration Zone: WHERE BONES BREAK**

COMFORT

SAFETY

LOW PROFILE

LIGHTWEIGHT

Exceptionally thin, flexible, and light, the protective element features a hexagon pattern that enables it to mold to your skin and match every move you make.

VENTILATION	★★	★★	★★	★★★★★	★★★★

SLYTECH SHIELD CARBON combines carbon fiber technology with our SLYTECH SHIELD material to obtain extraordinarily durable, lightweight and stiff shells.

SLYTECH MULTI DN technology with ribs designed to boost gate-clearing speed by limiting the contact surface and minimizing energy absorption on impacts.

SLYTECH SHIELD CARBON features NOFRICTION PTFE technology that drastically reduces friction between the gate and the guard. The embedded Teflon® (PTFE) in the blend lubricates the impact with the gate and boosts speed.

**STIFFNESS = SPEED**  
**MULTI DN = SPEED**  
**NOFRICTION = SPEED**

SLYTECH SHIELD is SLYTECH engineered material made with the most advanced technopolymers making it extremely stable and durable, both at low and warm temperatures. It also features NOFRICTION technology additives that minimize friction between the shell and the gate limiting speed loss.

Our proprietary foam provides simultaneously superior protection and unparalleled comfort.

Our protectors intelligently and progressively adapt to the different energies and speeds of impact to always provide complete protection.

Hard plastic can cause injury, even if it's only a strap adjuster. We chose to eliminate any possible hard plastic components from our products.

- + ALSO FEATURING: + Toxic free  
+ Nose wipe  
+ Super Tacky palm

## MITTENS FORTRESS MINI

- + SIZE: XXS, XS
- + MATERIALS: SLYTECH ONE
- + HAND PROTECTION TYPE: MITTS

SLYTECH SHIELD CARBON combines carbon fiber technology with our SLYTECH SHIELD material to obtain extraordinarily durable, lightweight and stiff shells.

SLYTECH MULTI DN technology with ribs designed to boost gate-clearing speed by limiting the contact surface and minimizing energy absorption on impacts.

NOFRICTION PTFE

SLYTECH SHIELD CARBON features NOFRICTION PTFE technology that drastically reduces friction between the gate and the guard. The embedded TeflonR (PTFE) in the blend lubricates the impact with the gate and boosts speed.

- + ALSO FEATURING: + Ready-on straps
- + Anatomical shape
- + Slygrip foam

# SLYTECH LINE OVERVIEW

# ..... STORY .....

Shred and Slytech began with a friendship and a shared commitment to enhancing our time in the mountains. And through the years, we've remained true to these roots.

I first met Carlo in the winter of 2005. When not working as a materials engineer, he raced for fun and tapped his extensive experience with carbon fiber to develop his own ski equipment. As someone who constantly tinkered with his own gear, I was intrigued by Carlo's work. Consequently, we quickly became friends and began collaborating on prototypes. Soon, some of the best skiers in the world began sporting his shinguards. And within a year of working together, I was able to take these products to the top of the Olympic podium. From this momentum and thirst for innovation, Slytech Protection was born.

Immediately, we began turning heads. Yet our vision transcended the race course. I was part of a new generation of skiers who raced

but didn't wish to be defined or constrained by it. We loved hitting the park, slashing pow turns, and hucking cliffs. Like many of my friends, I was just as influenced by freeskiing and snowboarding as I was by racing. Consequently, Carlo and I aimed to embrace and unite all snowsports. At the time, this approach was as unique as it was raw.

In the fall of 2006, we debuted Shred Optics. As with Slytech, our plans were simple. We wanted to develop products that looked as good as they performed—and not just on the race course, but also in the park and backcountry. Our inaugural collection consisted of a single goggle frame, available in a healthy dose of neon. Iconic, original, loud—whatever you called them, our goggles were visible from across the valley. About this same time, we also launched the first soft back protector with Slytech, which was soon worn by top freeskiers, snowboarders, and racers.

With hustle and grit, we worked to further refine our vision for Shred and Slytech. When not slaving away over R&D inside a garage, Carlo hijacked a corner of his father's office in Venice, Italy for our global headquarters. Meanwhile, we ran our US operations out of my attic in Park City, enlisting our friends as sales reps. We didn't have a business plan, but we had plenty of ambition.

Today, we have a few more products to our name, but our commitment to innovation is stronger than ever. Whether developing helmets, back protectors, sunglasses, or goggles, we're pioneering fresh technology and emerging as a market leader—while proudly maintaining our status as underdogs. By blending performance and style, Slytech and Shred help you have fun, stay safe, and push your limits. And ten years in, we're still building the products of our dreams.
