

GABEL®

SNOW
winter 2025 / 2026

AREA TECNICA / TECHNICAL AREA

FAST LOCK

Sistema di bloccaggio esterno ideale anche a basse temperature.

Fast and safe external locking system, ideal for low temperatures.

CLICK

Il sistema CLICK Gabel sgancia agevolmente il passamano.

CLICK Gabel system uses a lever that releases the strap easily by pressure on a button.

SOFT

Impugnatura traspirante e leggera.

Soft and light grip.

ALOCS

Ossidazione superficiale protettiva dell'alluminio.

Aluminum oxide coating surface protection.

ULTRA LIGHT

Rapporto peso lunghezza speciale

Ultralight poles with superior length/weight ratio.

A.I.

Anti Impact

Assorbe le vibrazioni dannose.

Absorbs harmful vibrations.

T.P.L.

Top Performance Locking

Sistema di bloccaggio interno con due punti di attrito.

Internal locking system with two points of friction.

U-LOCK

Ultra Lock

Sistema di bloccaggio ad alte performance con leva in alluminio.

High performance locking system with aluminum lever.

S-CARBON

Snake Carbon

Carbonio ad alto modulo a geometria speciale.

Special high module carbon fiber with special geometry.

CARBON

Tubi leggeri e resistenti in carbonio alto modulo.

Light and resistant carbon shafts.

KEVLAR

Carbonio alto modulo rinforzato con Kevlar.

High module carbon reinforced with KEVLAR fibers.

FTS

FTS Aluminum Technology

Costruzione e trattamento superficiale per la massima resistenza agli impatti e la miglior efficienza aerodinamica.

Geometries and surface treatments for high impact resistance and aerodynamic efficiency.

CARBIDE

Puntale in tungsteno. Carbide tip.

XC GRIP

Impugnatura ergonomica per sci di fondo e alpine touring. *Ergonomic grip for cross country and alpine touring.*

DUAL SPIKE LITE

Doppia punta in carbide progettata per lo sci alpinismo.

Double carbide tip designed for ski touring.

CARBIDE XC

Punta in carbide per la massima presa nello sci nordico.

Cross Country Carbide tip.

ERGO FIT

EN

The Ergo Fit grip has been designed with bio-mechanic in mind, for the maximum ergonomics, lightness and practicality. It has been developed to offer the same ergonomic regardless the the hand grip position, fitting every condition.

It is also extremely practical, due to the easy adjustment and removal of the washable strap, without any tool, thanks to the TCS (Gabel Patent).

IT

Progettata dopo accurati studi biomeccanici, l'impugnatura Ergo Fit unisce ergonomia, leggerezza e praticità. E' infatti studiata per mantenere la massima ergonomia anche con prese diverse, adattandosi a tutte le situazioni.

E' anche estremamente pratica perchè ospita il brevetto Gabel TCS, per regolare e rimuovere il lacciolo lavabile senza alcuno strumento.

DE

Der Ergo Fit Griff wurde unter Berücksichtigung der Biomechanik für maximale Ergonomie, Leichtigkeit und Bequemlichkeit entwickelt. Es wurde entwickelt, um unabhängig von der Handgriffposition die maximale Ergonomie zu bieten und für jede Bedingung geeignet zu sein. Dank des TCS (Gabel Patent) ist es aufgrund der einfachen Einstellung und Entfernung des abwaschbaren

CLICK ALPINE SKIING

ENG

CLICK Gabel system uses a lever that releases the strap easily by pressure on a button. Simple, reliable, safe, it holds up to 35 kg. Beyond this limit, the system releases the straps automatically.

FRA

Le système CLICK Gabel utilise un levier qui libère la courroie par simple pression sur un bouton. Simple, fiable, sûr, sa capacité de traction maximale est de 35 kg. Au-delà de cette limite, le système libère la main automatiquement.

ITA

Il sistema CLICK Gabel utilizza una leva che sgancia agevolmente il passamano mediante la semplice pressione esercitata su un pulsante.

Semplice, affidabile, sicuro, la sua capacità massima di trazione è di 35 kg. Oltre questo limite il sistema si sgancia in caso di USDuta o bloccaggio del bastoncino.

DE

Das CLICK-System beruht auf einem Hebel, der die Schlaufe löst, sobald der Knopf am oberen Teil des Griffes heruntergedrückt wird.

Funktionelle Vorteile:

- Einfachheit: lässt sich leicht auf- und zuklicken
- Zuverlässigkeit: funktioniert mit einer Fingerbewegung
- Sicherheit: die maximale Zugkraftkapazität des Systems beträgt 35 Kilo. Das heißt, dass die Hand im Fall eines Sturzes oder einer Skistockverklammerung befreit wird.

GATE POWER

ENG

The Gate Power technology, developed with our trainers, is a great help for lighter and less powerful athletes. In slalom, in fact, the mass of the athlete may not be enough to guarantee a complete knock down of the gates. This solution, therefore, with the addition of a 210-grams weight in the inner part of the grip, increases the ability to push the gates down without compromising the balance of the pole and without causing excessive stress to the joints of the upper limbs. This results in more aggressive lines and better performance even for the less powerful athletes.

FRA

La technologie Gate Power, développée avec nos entraîneurs, est une aide précieuse pour les athlètes plus légers et moins puissants. En slalom, en effet, la masse de l'athlète peut ne pas être suffisante pour assurer un abattement complet des piquets. Cette solution,

par conséquent, avec l'ajout d'un poids de 210 grammes dans la partie interne de la poignée, augmente la capacité de pousser les piquets sans compromettre l'équilibre du bâton et sans causer une contrainte excessive aux articulations des membres supérieurs. Il en résulte des courbes plus agressives et de meilleures performances, même pour les athlètes moins puissants.

ITA

La tecnologia Gate Power, sviluppata con i nostri allenatori, rappresenta un grande aiuto per gli atleti e le atlete più leggeri e meno potenti. Nello slalom, infatti, la massa dell'atleta può non essere sufficiente a garantire un completo abbattimento delle porte. Questa soluzione, appesantendo di 210 grammi la parte interna all'impugnatura, aumenta la capacità di abbattimento delle porte senza pregiudicare il bilanciamento del bastoncino e senza causare stress eccessivi alle

articolazioni degli arti superiori. Il risultato sono traiettorie più aggressive e migliori performance anche per gli atleti meno potenti.

DE

Die Gate Power Technologie, die zusammen mit unseren Fahrern und Trainern entwickelt wurde, ist eine große Hilfe für leichtere und weniger kraftstrotzende Athleten. Beim Slalom kann die Masse des Läufers eventuell nicht ausreichen, um ein vollständiges Wegschlagen der Tore zu garantieren. Die Lösung: Ein zusätzliches Gewicht von 210 Gramm im inneren Teil des Griffs erhöht die Fähigkeit die Tore wegzudrücken, ohne das Gleichgewicht des Stockes zu beeinträchtigen und somit ohne übermäßige Gelenkbelastung der oberen Gliedmaßen.

Das Ergebnis sind aggressivere und direktere Linien durch den Slalomkurs und somit eine bessere Leistung, auch für weniger muskelbepackte Athleten.

SNAKE CARBON

ENG

The recent "Snake Carbon" technology applied to the latest models developed by Gabel combines the excellent resistance of high modulus carbon fibre with a distinctive geometric structure, adding an innovative type of crystallisation technology. This process allowed to make the tubes 20% lighter, as well as boosting resistance by 18%. The combination of HD technologies with these new processes and materials has thus allowed us to introduce an outstanding new product onto the market.

FRA

La récente technologie "Snake Carbon" appliquée aux derniers modèles conçus par Gabel unit la grande résistance du tissu en carbone haut module à une structure géométrique

spéciale, ajoutée à une innovante technologie de cristallisation. Ce processus a permis la réduction du poids des tubes d'environ 20% en augmentant leur résistance de 18%. Et donc, l'union des technologies HD à ces nouveaux processus et matériaux nous a permis d'introduire sur le marché, une nouveauté de très haut.

ITA

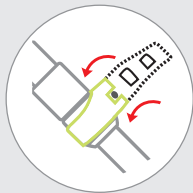

La recente tecnologia "Snake Carbon" applicata agli ultimi modelli sviluppati da Gabel, unisce l'elevata resistenza del tessuto in carbonio ad alto modulo ad una particolare struttura geometrica, abbinata ad una innovativa tecnologia di cristallizzazione. Tale processo ha permesso la riduzione di peso dei tubi di circa il 20%, aumentando la resistenza del 18%. L'abbinamento, quindi, delle tecnologie HD

con questi nuovi processi e materiali, ci ha consentito di introdurre nel mercato una novità di altissimo livello.

DE

Unsere neuentwickelte "Snake Carbon" Technologie verbindet die extrem hohe Widerstandsfähigkeit des Carbon-Gewebes mit hohem Modul mit einer ganz besonderen geometrischen Struktur, kombiniert mit einer innovativen Kristallisierungstechnologie. Dieses Verfahren ermöglicht die Verminderung des Gewichts der Rohre um mehr als 20%, bei gleichzeitiger Verbesserung der Widerstandsfähigkeit um 18%. Die Kombination von HD-Technologien mit neuen Produktionsverfahren und Materialien hat es uns somit ermöglicht eine Neuheit auf höchstem technischem Niveau auf den Markt zu bringen.

MONO LOCK

ENG

Monolock is the latest development of the Gabel Fast Lock systems, based on the principle of the adjustable clamp. The evolution of the materials has made it possible to make the design minimalistic, with fewer moving parts and a clamping capacity further increased by 20%, compared to the previous generation. The small size improves the look of the poles without affecting their practicality, as the clamping lever and the adjustment wheel remain of an ergonomic shape and size, and can also be used with gloves.

FRA

Monolock est le dernier développement des systèmes Gabel Fast Lock, basé sur le principe de la pince à tension réglable. L'évolution des matériaux a permis de rendre le design minimaliste, avec moins de pièces

mobiles et une capacité de serrage encore augmentée de 20% par rapport à la génération précédente. La petite taille améliore la ligne des bâtons sans affecter leur praticité, car le levier de serrage et les roues de réglage restent de forme et de taille ergonomiques, et peuvent également être utilisés avec des gants.

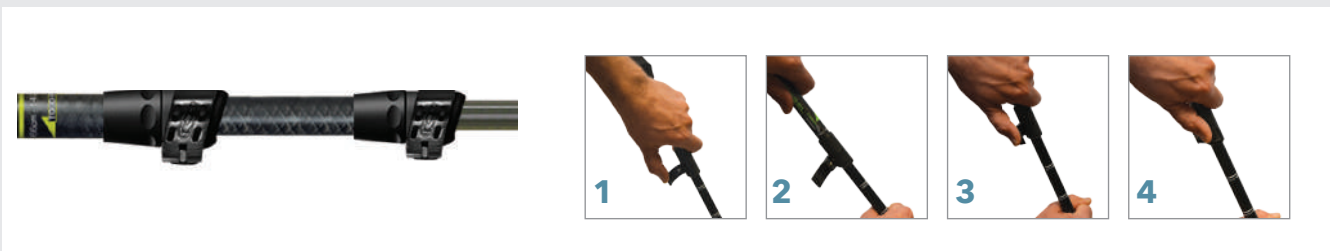

ITA

Monolock è l'ultimo sviluppo dei sistemi Fast Lock Gabel, basati sul principio del morsetto a tensione regolabile. L'evoluzione dei materiali ha permesso di rendere il design minimalistico, con meno parti in movimento e una capacità di serraggio aumentata ulteriormente del 20% rispetto alla generazione precedente. Le dimensioni ridotte migliorano la linea dei bastoncini senza inficiarne la praticità, in quanto la leva di serraggio

e le rotelle di regolazione rimangono di forma e dimensioni ergonomiche, e possono essere utilizzate anche con i guanti.

DE

Monolock ist die neueste Entwicklung der Gabel Fast Lock Systeme, basierend auf dem Prinzip der Klemme mit einstellbarer Spannung. Die Weiterentwicklung der Materialien hat es möglich gemacht, das Design minimalistisch zu gestalten, mit weniger beweglichen Teilen und einer um 20 % erhöhten Klemmkapazität im Vergleich zur vorherigen Generation. Die geringe Größe verbessert die Linienführung der Stöcke, ohne die Praktikabilität zu beeinträchtigen, da der Klemmhebel und die Verstellräder in ergonomischer Form und Größe bleiben und auch mit Handschuhen verwendet werden können.

DUAL SPIKE LITE

ENG

The new Dual Spike Lite tip further improves the already popular Dual Spike. Developed in collaboration with the best athletes, it is now lighter and more resistant, even to lateral loads. The new asymmetrical design also guarantees progressive grip in all situations, including uphill, downhill, ice and rock.

FRA

La nouvelle pointe Dual Spike Lite améliore encore la Dual Spike déjà populaire. Développée en collaboration avec les meilleurs athlètes de ski

de randonnée, elle est désormais plus légère et plus résistante, même aux charges latérales. Le nouveau design asymétrique garantit également une adhérence progressive dans toutes les situations, montée, descente, glace et rocher inclus.

ITA

La nuova punta Dual Spike Lite migliora ulteriormente la già apprezzata Dual Spike. Sviluppata in collaborazione con i migliori atleti di sci alpinismo, è ora più leggera e resistente, anche ai carichi laterali. Il nuovo disegno asimmetrico, inoltre, garantisce un

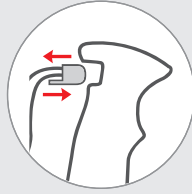

grip progressivo in tutte le situazioni, salita, discesa, ghiaccio e roccia incluse.

DE

Die neue Dual Spike Lite Spitze verbessert den bereits beliebten Dual Spike weiter. In Zusammenarbeit mit den besten Skitourensportlern entwickelt, ist er jetzt leichter und widerstandsfähiger, auch gegen seitliche Belastungen. Das neue asymmetrische Design garantiert zudem progressiven Grip in allen Situationen, bergauf, bergab, Eis und Fels inklusive.

T.C.S. AUTOMATIC TOP CLICK SYSTEM

ENG

A quick-release system allowing simple and secure strap adjustment, and also very easy replacement.

FRA

Système de déclenchement instantané qui permet un réglage simple et sûr de la dragonne et en permet le remplacement avec extrême facilité.

ITA

Sistema di sgancio rapido che consente una regolazione semplice e sicura del passamano e ne permette la sostituzione con assoluta facilità.

DE

Dieses Schnellauslösesystem erlaubt eine einfache und sichere Anpassung der Stockschlaufe und zudem einen einfachen Austausch.

REMOVABLE AUTOMATIC STRAP ADJUSTMENT

1

ENG Pull the strap upwards, in order to open the top part of the grip

FRA Tirez le gantelet en haut, en ouvrant la partie supérieure de la poignée

ITA Tirare il passamano verso l'alto, in modo da aprire l'inserto nella parte superiore dell'impugnatura

DE Schlaufe nach oben ziehen und die obere Seite des Griffes öffnen

2

ENG Pull the top of the strap to enlarge it

FRA Tirez la partie supérieure du gantelet

ITA Tirare la fibbia superiore del passamano per allungarlo

DE Den oberen Teil der Schlaufe ziehen = Verlängern !

3

ENG Pull the lower edge of the strap to make it shorter

FRA Pour réduire la largeur du gantelet tirez la partie inférieure

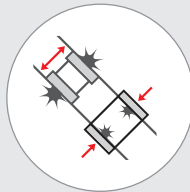

ITA Tirare il lembo inferiore per accorciare il passamano

DE Den unteren Teil der Schlaufe ziehen = Verkürzen !

MULTI LOCKING SYSTEM

ENG

In order to maximize the locking power of the models featuring the FAST LOCK, Gabel introduces the MULTI LOCKING concept that couples the locking force of the lever with the reliability of the traditional locking system with expander. The addition of an extra locking mechanism, the LITE LOCKING SYSTEM, guarantees total hold of the pole in every temperature and terrain condition.

FRA

Afin de maximiser la capacité de verrouillage des modèles équipés du système FAST LOCK, Gabel introduit le concept MULTI LOCKING qui allie la force de verrouillage du levier à la fiabilité du système de verrouillage traditionnel avec extenseur. L'ajout d'un système de verrouillage supplémentaire, le système LITE LOCKING, assure une performance maximale du bâton quelles que soient les conditions climatiques ou de terrain.

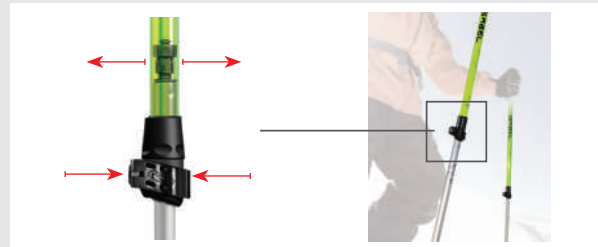

In order to maximize the locking power of the models featuring the FAST LOCK, Gabel introduces the MULTI LOCKING concept that couples the locking force of the lever with the reliability of the traditional locking system with expander. The addition of an extra locking mechanism, the LITE LOCKING SYSTEM, guarantees total hold of the pole in every temperature and terrain condition.

ITA

Per ottimizzare il bloccaggio dei prodotti con FAST LOCK, MULTI LOCKING unisce la tenuta del morsetto all'affidabilità del tradizionale sistema ad espansore. Un secondo sistema di bloccaggio interno, il LITE LOCKING SYSTEM, assicura inoltre la totale chiusura in ogni condizione di temperatura e terreno.

DE

Um die Blockierung der Produkte mit FAST LOCK noch mehr zu verbessern, stellt Gabel unser MULTI LOCKING vor. Dabei wird der Halt der Klemme mit der Zuverlässigkeit des traditionellen Systems mit Expander verbunden. Das Hinzufügen eines zweiten internen Blockiersystems, das LITE LOCKING SYSTEM, garantiert den vollkommenen und kompakten Verschluss bei allen Temperatur- und Terrains.

WIRED TECHNOLOGY

ENG The innovative technology WIRED will allow you to collapse your pole, using a simple button. The different pole's sections are connected with a high-strength cable. The advantage of this technology is having a pole very compact, light, less bulky and easy to carry.

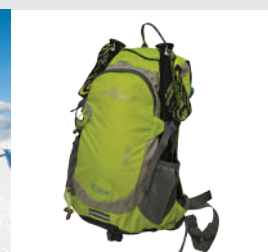

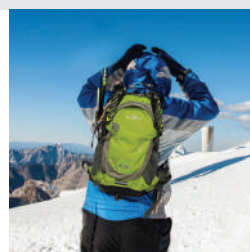

FRA La technologie innovante WIRED vous permettra de plier votre bâton, en utilisant simplement un bouton. Les différentes sections du bâton sont reliées entre elles par un câble. L'avantage de cette technologie est d'avoir

un bâton compact, léger et facilement transportable.

ITA L'innovativa tecnologia WIRED vi permetterà di piegare il vostro bastoncino dopo l'uso per avere il minor ingombro possibile, utilizzando un semplice pulsante. Le diverse sezioni del bastoncino sono unite tra loro con un cavo in acciaio rivestito in plastica. Il vantaggio di questa tecnologia è avere un bastoncino compatto, leggero, poco ingombrante e facilmente trasportabile.

DE

Die innovative WIRED-Technologie ermöglicht es, den Stock auf ein sehr kompaktes Packmaß zu falten, einfach und schnell durch den Pinverschluss. Durch das Zeltstangenprinzip ist der Stock im Handumdrehen wieder einsatzbereit. Der Vorteil liegt im Rucksacktauglichen Packmaß und in der einfachen Bedienung. Leicht, stabil und solide.

N.C.S. NORDIC CLICK SYSTEM

1
Push the plastic edge till the end of the hole (you will hear a click).

Poussez l'extrémité en plastique jusqu'à la fin du trou (vous entendrez un clic).

Inserire completamente la testa in plastica del passamano nel foro dell'impugnatura (si deve sentire un "click").

Drücken Sie den Kunststoffstift bis zum Ende der Öffnung (Sie werden einen Klick hören).

2
The strap is now fixed.

Maintenant la dragonne est fixée.

Il passamano ora è fissato all'impugnatura.

Die Griffschleife ist jetzt fixiert.

3
Release your hand from the pole by pushing the top button N.C.S.

Relâchez votre main du bâton en appuyant sur le bouton en haut. Premere il pulsante in testa all'impugnatura per rilasciare il passamano N.C.S.

Lösen Sie die Hand aus dem Stock durch drücken des oberen Knopfes.

4
Your hand is now free!

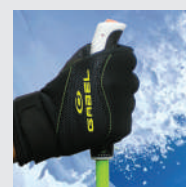

Maintenant votre main est libre!

La Vostra mano ora è libera!

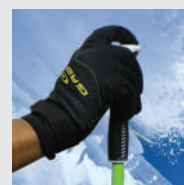

Ihrer Hand ist jetzt frei!
