Our Values

Be the best.

We never settle for less than delivering excellent products for all skiers.

Do the right thing.

We always treat people and the planet with integrity.

Build relationships.

We empower community through shared passion. We build deeper bonds between people and their skis.

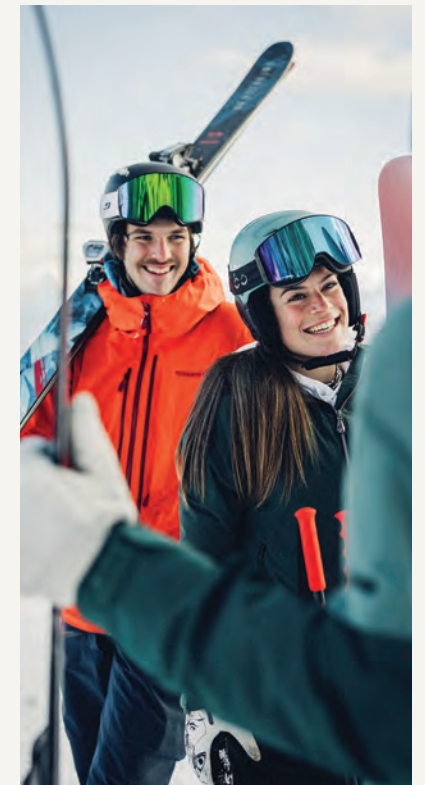

Keep creating legacy.

Our experience and expertise fuel leading innovation and help shape the future of skiing.

Share the joy.

We love what we do. We live to share the fun and happiness skiing brings into our lives.

Manifesto

This one goes out to all the people who love to ski. To every skier who makes each run one to remember.

And to everyone who opens their powder-packed hearts to the world.

This goes out to the boots and skis that make our days brighter and our runs better.

To the adventures that bring us closer and remind us what matters.

Together, we create family and fellowship. We always raise the bar. We play it our way.

And we invite the world to come along with us.

NORDICA

LET'S SKI

Skis

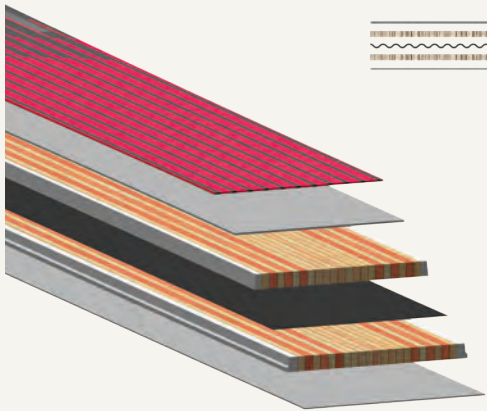

Double Core.

Double the Core. Double the Fun.

Yet when we began developing our **Double Core technology**, we didn't anticipate that it could transform skiing across the globe. Initially, the Nordica ski development team—led by Product Manager Florian Seer—aimed to reimagine how a women's ski could perform. This led Nordica's research and development team to divide the wood core—the soul of the ski—into two layers and embed an elastomer **Pulse Core** between them. This dampened vibrations to create a smooth yet powerful ride that boosted confidence.

The Multi Family.

Multigara and Multipista.

The Story of the Multi-Family.

PRECISION DOESN'T HAPPEN BY ACCIDENT.

It's earned - turn by turn, prototype by prototype. Over time, the **Multi Family** has evolved into a collection built for skiers who don't accept compromise. They crave performance. Every detail is the result of years of research, relentless on-snow testing, and the **World Cup pedigree of our Dobermann race heritage.**

The outcome? Skis that are quicker edge-to-edge, smoother through transitions, and more stable at speed.

Each model features performance-driven titanal layers, responsive wood cores, and a range of waist widths to match your style.

NOTHING IS ACCIDENTAL. EVERYTHING IS INTENTIONAL. ALWAYS DOBERMANN.

DOUBLE THE CORE. DOUBLE THE FUN.

Multigara

FOR THOSE WHO ANTICIPATE EVERY TURN, DRIVE INTO THE CARVE, AND THRIVE IN THE TRANSITION AS THEY ACCELERATE INTO THE NEXT EDGE.

Full power.

FOR EVERY DAY. FOR EVERY RUN.

Multipista

A SKI FOR THOSE WHO CHASE TURNS FROM FIRST CHAIR TO LAST, DELIVERING CONSISTENT PERFORMANCE ACROSS ALL ON-PISTE CONDITIONS.

Adaptively smooth and stable.

New Dobermann Multigara Dept.
Feel the Bite.

THE NEW

Dobermann Multigara Dept.

INTRODUCING THE ALL-NEW MULTIGARA DEPT - the pinnacle of the Multi family, crafted for skiers who demand nothing less than the best.

The ski impresses with its **modified World Cup construction**, a highly sporty sidecut, and moderate radius.

It's built for those who want race-level precision, with the freedom to carve their own line. At its core is Nordica's **new Energy 2 Ti DC Dept. construction** features two layers of titanal which sandwiches a shock-absorbing Pulse Core elastomer layer between two wood cores for unmatched power and response. Phenol sidewalls boost energy transfer and reduce drag, letting you push harder with less effort.

And with a Marker Piston Plate underfoot, you get race-proven edge hold, rebound, and control - turn after turn.

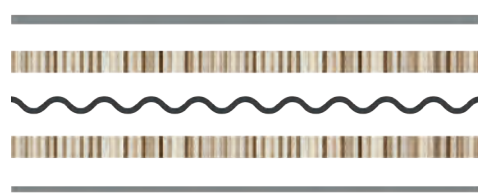

Energy 2 TI Double Core Dept.

Built for the high-speed demands of high-performance carving. Engineered to deliver the perfect balance of precision, power, and feel. Our Energy 2 Ti DC Dept construction was built to attack the slope.

A Pulse Core elastomer layer is sandwiched between dual wood cores for enhanced dampening, while two layers of Titanal - 0.4 mm on the bottom and 0.6 mm on top - maximize energy transfer and stability.

It's a race-inspired platform, fine-tuned for pinnacle on-piste performance.

- **DUAL WOOD CORES:** for maximum energy transmission
- **PULSE ELASTOMER:** for reduced chatter and smoother ride
- **TITANAL TOP AND BOTTOM LAYERS:** for strength and terrain-absorbing stability

- Titanal **0.6**
- Woodcore
- Pulse Core
- Woodcore
- Titanal **0.4**

Marker Piston Plate

The Marker 10 mm World Cup Piston Plate levels up the experience of any ski it touches- substantially improving damping, stiffness, and precision. It's not for everyone. But it's perfect for the Multigara Dept skier and the performance they demand.

Ski Touring-Redefined

UNPARALLELED AND OUTSTANDING.

Unlimited DC Ski - a brilliant all-rounder that combines a completely new design, unparalleled stability with superb downhill performance, lightness, and playful agility.

It sets a new benchmark.

FOR A SENSATIONAL FEELING OF FREEDOM AND UNIQUE TOURING EXPERIENCES.

THE NORDICA WAY & APPROACH.

Thinking Outside the Box.

Our ski product manager Florian Seer and his team didn't want to develop just any new touring ski, but a unique, innovative hero product that would redefine ski touring. **The idea: to combine the best of the best in one product.** To achieve this goal, they made smart use of all resources and initiated a unique development process.

THE MAGIC FORMULA.

Perfect Match of Synergies.

The innovative **Ski Excellence Center in Mittersill** provides first-rate conditions with its state-of-the-art machines and production facilities, tools, and perfect measuring and testing stations. Add to that Nordica's sophisticated, unique, and proven technologies, and cap it all with the incredible **Nordica team: people who love skiing and ski touring**, who are passionate, meticulous, and clever in their work, who use their valuable experience, and who set the highest standards for themselves. This brilliant match is perfect - perfect for creating extraordinary products - products that excite and inspire.

INGENIOUS. UNIQUE. PERFECT FLOATATION.

Concept: Length & Waist-Width

The Nordica team is guided by a constant passion to develop and deliver new ideas that excite and inspire skiers from all over the world and help them reach a unique state of flow. This drive gave rise to the vision of designing a touring ski model that offers every tourer the same performance, the same floatation and the same sensational skiing experience- regardless of gender, height, and weight. Every aspect was carefully considered and meticulously calculated during the design phase. **The result is the unique Nordica LENGTH & WAIST-WIDTH concept, which sets a new benchmark worldwide.**

Precisely tuned and harmoniously coordinated, each length correlates with an individual waist width. The shorter the ski, the narrower the waist; conversely, the longer the ski, the wider the waist. **The result: the construction provides solid support on the ascent and sensationally balanced floatation on the descent.**

- **LONGER SKI** wider waist > more floatation
- **SHORTER SKI** narrower waist > minimized weight
- **UNIQUE concept, construction and skiing experience**
