C.A.S.

Custom Adaptive Shape

C.A.S. Liner

C.A.S. has revolutionized ski boots with regards to fit and personalization. The liners are anatomically shaped for optimal comfort and offer great heel hold. The internal part of the liner is shaped to match the foot while the exterior matches and conforms to the shape of the shell. The dual density micro-cell material is durable and easy to customize. The C.A.S. liners are less prone to pack-out maintaining the fit over a longer period of time.

Liner features

- Anatomic and precise shape
- Dual density pre-shaped thermoformed microcell material
- Great out-of-the box fit
- Enhanced sensitivity

Liner customization

- FLOATING TONGUE to adjust instep area
- THERMO-SHAPING liner in the oven: 80°C - 176°F / 6 minutes.
- PUNCHING (increase volume) microcell material can be heated and punched in problem fit areas.
- GRINDING (increase volume) microcell material is easily grindable up to 2mm in problem fit areas.
- FIT KIT (decrease volume) glue the c.A.S. Fit kit pre-shaped pieces to decrease the volume of the liner.

CUSTOM ADAPTIVE SHAPE

C.A.S. Shell

The C.A.S. Shell has an anatomical shape that matches the shape of the foot. This allows for a better out-of-the box initial fit. The dimples on the shell offer less surface tension and facilitate heating, making customizing the shell easier. The shell retains the new shape better and longer.

Shell features

- Anatomic and precise shape
- Easier and faster thermo-forming
- Easy customization

Shell customization

- PUNCHING (increase volume)
- GRINDING (increase volume)

Best Fit Out Of The Box

The anatomical shape of the liner and shell are the key to a great out-of-the-box fit.

The closer the liner and shell match the natural shape of the foot, the better the fit and performance will be.

Volume Concept

Best fit out-of-the box. Precise anatomical shape results in an accurate fit that offers more comfort and better performance. To guarantee the perfect fit matching every foot shape.

Tecnica offers 5 different volumes:

- LOW VOLUME: 98 mm
- MID VOLUME FREERIDE: 99 mm
- MID VOLUME: 100 mm
- HIGH VOLUME FREERIDE: 102 mm
- HIGH VOLUME: 103 mm

T.Power

New T-Drive 2.0 on MACH1 LV series

Performance

Tecnica's new T-Drive 2.0 connects the shell to the cuff in a new and innovative way. The cuff is free to slightly rotate in the front, which enhances power transmission to the front of the boot – where the skier needs it most.

Benefits:

- Supplying a long, consistent and progressive flex.
- Efficient Power Transmission without material deformation.

T-Drive on MACH1 MV & HV series

Drive Precision

The T-Drive dynamic carbon connector creates a longer lever arm compared to traditional ski boots.

This allows:

- Quicker edge to edge transitions.
- Increased lateral power and stability.
- Edge drive precision.

T-Ride on COCHISE series

High Performance Walking System

The T-Ride system is fully integrated into the boot design. It's a solid cuff-to-shell connection which delivers the perfect combination between downhill performance and uphill hiking ability.

T-Hike on ZERO G series

Where Walkability Matches Downhill Performance

The T-Hike available on Zero G Peak and Zero G Tour features the unique Double Blocking Mechanism. It offers strong, progressive flex and great lateral power transmission. The shell is connected to the cuff at two separate points, and once in hiking mode it guarantees unrestricted walkability. In addition, the internal spoiler delivers unique solidity to the boot on downhill.

Give your old ski boots a second life.

RECYCLE YOUR BOOTS

“We are at the beginning of a new way of conceiving the skiboot life cycle. Recycle Your Boots is not the final answer, not yet, but it is a site of constant innovation.”

Plastic waste is a problem.

Recycle Your Boots was born from the consciousness that our society globally is producing an enormous quantity of waste. And that plastic has become a big problem for our planet, literally as big as a continent. When old ski boots reach the end of their usable life, they often end up in a dump or are burned in waste-to-energy plants.

We want to make it possible for anyone to return their old boots, from any brand. Tecnica will recycle up to 85% of the old pair, in a transparent and sustainable process.

Tecnica launched in 2021 the Recycle Your Boots campaign to make a circular economy the new business model for the ski industry. The collecting and recycling initiative was adopted by the life programme – the EU’s funding instrument for the environment and climate action – and is effective across thirteen countries as early as this winter season.

Since 2021, we have already collected over 29000 pairs of ski boots across Europe.

Real Feel.

NEW T-DRIVE 2.0

The new T-Drive 2.0 is a two-piece mechanism that actively connects the shell and cuff. Its dynamic design allows the cuff to slightly rotate at the front, enhancing power transmission to the skier's forefoot—where it matters most. This innovative system reduces shell deformation, delivering a consistent and progressive flex regardless of temperature. With T-Drive 2.0, skiers gain greater control and freedom to harness the boot's full potential.

BENEFITS

- Flex of the boot: 100% depending on T-Drive 2.0
- Cuff rotates without material deformation of the shell
- Flex is consistent throughout a wide range of temperatures
- Flex is longer and more progressive

C.A.S. LINER

We take our liners very seriously. Without the same level of focus and commitment that go into our shells, we couldn't deliver on the fit, performance and personalization that we promise from Mach1 LV. With 46 individual parts going into each line - 36 requiring hand stitching - our inside is as much of a piece of art as our outside. Real Feel from the Inside- Out.

Zero G Tour Pro

The hits keep coming with the Zero G Tour Pro. Recently redesigned from the ground up to rave reviews, this boot received a few minor tweaks to keep a best-in-class boot evolving in the right direction. Stiff enough to be looked at as a freeride boot and light enough to be the go-to piece for major uphill missions, the Zero G Tour Pro threads the line between lightweight and performance. With zero friction in walk mode, this boot is trusted by professional guides who make their living on the skin track. And, with a precise anatomical fit and natural flex, pro skiers trust this boot for film segments and burly descents.

Touring

ZERO G TOUR PRO
